EXPERIENCE

TRAINNING(INTERNSHIP)

Tech Creature Solutions Pvt. Ltd.

Jan–Apr 2024

I interned as a Web Developer at Tech Creature Solutions for 3-4 months. During my internship, I worked on JOB TRACKING APP, developing and maintaining web applications to streamline workflow and improve efficiency. My role involved coding, debugging, and collaborating with the team to enhance the functionality of the job tracking system. As an intern, my primary role was "a software development intern" My responsibilities included, "developing software solutions," "creating and testing code," and also added a company module in the Job Tracking App Project.

SAP (Systems, Applications and Products in Data Processing)

SSIT|2023

Worked on enterprise software solutions and business analytics projects at SAP. Added new features and performed detailed data analysis. Contributed to the Product Recommendation System project, which aimed to suggest relevant products to customers based on their preferences and behaviors. Participated in a mock test project, which involved creating and analyzing test scenarios to ensure software reliability. Gained experience in enterprise resource planning and customer relationship management systems. Improved skills in Java, problem-solving, and software development in a corporate setting.

EDUCATION

BACHELOR OF COMPUTER ENGINEERING

Shree Swaminarayan Institute of Technology

Sri Cahitainya junior College, Telangana
2018- 2020

Percentage:97

10TH (GSEB)

Gyansthali Bhadeja Gaya, Bihar
2018

Percentage:80

PROJECTS

E-COMMERCE WEBSITE
React Js Web Application
2024

I developed an e-commerce platform using React.js. It features a user-friendly interface for seamless shopping, product browsing, and secure transactions. The platform includes dynamic product listings, a responsive design for mobile and desktop, and integrated payment gateways to ensure a smooth and efficient user experience.

EVENT MANAGEMENT SYSTEM
Hackathon at Nirma | React Js Web Application
2022

Participated in the 2022 Hackathon at Nirma University, where our team developed an Event Management System using React JS. This 24-hour challenge focused on creating an efficient solution for event planning and coordination. Played a key role in integrating Firebase authentication for better security and user management. The experience boosted technical skills and teamwork..

JOB TRACKING APP 🔗
SSIT | MERN

2024

Job Tracking App aims to streamline the job search process, connecting job seekers with employers efficiently and effectively. The platform leverages advanced technology to provide tailored job recommendations, enhance application processes, and facilitate career growth.
Technology:
ReactJs, BootstrapCSS,(StyledComponents), MongoDB, NodeJs,ExpressJs

PRODUCT RECCOMEMDATION SYSTEM
SAP|SSIT
2022

Contributed to the Product Recommendation System project at SAP. The system aimed to suggest relevant products to customers based on their preferences and behaviors. Worked on developing algorithms to analyze customer data and provide personalized recommendations. Improved the accuracy and efficiency of product suggestions, enhancing the overall customerexperience.
